**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

Examiner acknowledges receipt of amendment and remarks filed 08/16/04. Claims 35 and 37-46 are pending.

#### *Claim Rejections - 35 USC § 103*

1. Claims 35 and 37-46 remain rejected under 35 U.S.C. 103(a) as being unpatentable over Hirakawa et al. (US 5,725,880) in view of Khan et al. ("A pH-dependent colon targeted oral delivery system using methacrylic acid copolymers I. Manipulation of drug release using EUDRAGIT L100-55 and EUDRAGIT S100 combinations, J. of Controlled Release, 58, (1999) pp 215-222).

Applicant argues that Khan seeks a "single coating system for colon targeted oral delivery of drugs" and that such single coated system does not teach or suggest separation of an active ingredient into discrete coated portions."

2. Applicant's arguments filed 08/16/04 have been fully considered but they are not persuasive.

Although Khan may seek a single coating system, it is respectfully noted that the Khan coated layer disintegrates at different pHs. Specifically, Table 1, page 218, formulation 3:2 at level 13.9 disintegrates at pH of 6.0, 6.5, 6.8 and 7.0. Hirakawa discloses granules of 5-Aminosalicylic acid or mesalazine that are coated with pH dependent coating materials for delivery of the medicine to targeted site in the gastrointestinal tract. Thus the combined reference renders the claims obvious.

No claim is allowed.

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
